

Grease-proof laminates for butter, fats, curd and ice-cream

DESCRIPTION

The wrappers for butter and fats are from aluminium foil laminated to special grease-proof paper which together with wax adhesive providing resistance against the intrusion of fat. Laminates are also available from aluminium foil backed with polyethylene (PE) coated paper.

The wrappers for curd and ice-cream (block form) are from aluminium foil laminated to specially treated paper firm in wet state, which together with wax adhesive provides excellent strength in a moistened state.

The wrappers for ice-cream (cone form) are from aluminium foil laminated to paper through the application of dispersion adhesive.

All laminates can be 6 colour rotogravure, 8 colour flexo-graphically printed or non-printed.
