

Foil for chocolate figures, bars and sweets

DESCRIPTION

Chocolate products and sweets must be protected against the influence of the light, humidity, air and the penetration of fat whilst retaining the product flavour. Production of packaging meeting these sophisticated demands has a long tradition in our company.

The foils can be supplied printed or non-printed with the option of embossing and coloured or clear lacquering. Some types of wrappers can also contain a heat sealing lacquer coat allowing seal closing of the wrapped product.

TYPICAL APPLICATION

- For the packing of chocolate figures, bars and sweets.

STANDARD MANUFACTURED FOIL

Aluminium foil for chocolate bar wrapping

Available un-lacquered and one-side lacquered with colourless lacquer. We also supply embossed foil using various graphic and text images. The foil can be between 10 and 14 μm .

Tinted aluminium foil for wrapping sweets and chocolate products

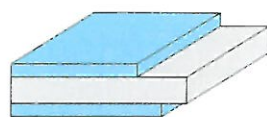

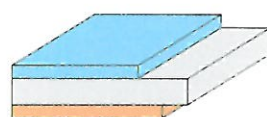

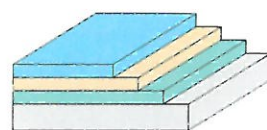

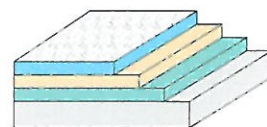

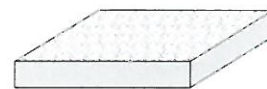

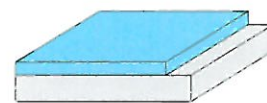

For wrapping sweets we produce aluminium foils between 10 and 14 μm plus a foil of 50 μm all-face tinted or printed, with the option of protective coating of lacquer. The foil can be supplied embossed with the customer's image.

Printed aluminium foil for wrapping chocolate figures and sweets

Foil for wrapping chocolate figures and sweets are between 10 and 14 μm and can be printed by rotogravure or flexography; the printed surface can be coated by protective lacquer. The foil can be supplied embossed with the customer's image.

Sealable aluminium foil for wrapping chocolate bars with a long shelf life

Aluminium foil supplied with one-side coated with heat-sealing lacquer or with both-sides coated with a protective and heat-sealing lacquer. The heat-sealing lacquer allows sealing at low temperatures (approximately 75°C). The foil can be between 10 and 14 μm . The foil can be supplied embossed with the customer's logo.
