

Pharmaceutical and cosmetic wrappers

DESCRIPTION

Blister foil or "blisters" are for the wrapping of pharmaceutical and cosmetic products. Our foils meet the demand for resistance against the intrusion of moisture, oxygen, light, dust particles and escaping odour. It is possible to print on the surface of the foil and in its rigid form aids easy access to the packed product.

TYPICAL APPLICATIONS

- Tablet and pill wrapping.
- The wrapping of pharmaceutical creams and ointments.

STANDARD MANUFACTURED BLISTER FOILS

We offer blister foils between 20 and 25 μm in both rigid and annealed forms. The foil side for closing the wrapped product is coated by a layer of heat sealing lacquer for sealing to polystyrene (PS), polypropylene (PP) or polyvinylchloride (PVC). The foils can be printed by rotogravure to a maximum of 6 colours or flexo-graphically to a maximum of 8 colours.

For deliveries of any modifications of the products listed in our product specification please contact one of our Key Account Managers to discuss your individual needs.
